On November 07, the Medical Physics Division of Khwaja Yunus Ali Medical College & Hospital (KYAMCH) Cancer Center proudly celebrated the International Day of Medical Physics (IDMP) 2025. The event took place at the Dr. M. M. Amjad Hussain auditorium, where a full day of academic discussion revolved around the global theme: “Medical Physics and Emerging Technologies: Shaping the Next Decade”.

The gathering showcased esteemed speakers, including a virtual keynote from Prof. Dr. Golam Abu Zakaria,

a trailblazer in medical physics education in Bangladesh. He accentuated “**New Aspects of Medical Physics in radiation Oncology and Imaging**” and also emphasized the importance of qualified Medical Physicist to ensure accuracy & safety in healthcare. Alongside, the event was graced by in-person presence of Prof. Dr. Hasin Anupama Azhari, President of the Asia-Oceania Federation of Organizations for Medical Physics (AFOMP). She highlighted “**Structure, Aims and Functions of AFOMP**”. Both

speakers also underscored the urgent necessity for enhanced academic training and adherence to international standard in radiotherapy.

Conversations during the event illuminated the changing landscape of medical physicist’s role within multidisciplinary cancer care. The program culminated in a ceremony that celebrated excellence in radiotherapy treatment, reinforcing KYAMCH’s dedication to clinical precision. The session featured by Md. Yusuf, Honorable Society Director of KYAMCH, as the chief guest. He advised “**Work together and be a hope for cancer patient**” and also gave his heartfelt appreciation to all medical physicist’s whose work silently powers the precision and progress of modern medicine.

Founded in 2007, by visionary legendary Dr. Mir Mohammad Amjad Hussain, the KYAMCH Cancer Center proudly upholds its reputation as a frontrunner in regional oncology, having pioneered the first LINAC services beyond the capital city. KYAMCH Cancer Center believe that oncologists, medical physicists, technologists, nurses together is a team, all of their dedication and compassion ensure world-class cancer treatment even in a resource-constrained environment.
