NICVD Inaugurates State-of-the-Art TLD Lab for Enhanced Radiation Safety

The National Institute of Cardiovascular Diseases (NICVD) proudly announces the opening of its state-of-the-art Thermoluminescence Dosimetry (TLD) Lab, inaugurated by Executive Director, Professor Tahir Saghir.

Following the inauguration, an insightful session was held to discuss the significance of this advanced facility. The new TLD Lab is a milestone for NICVD, as it ensures precise radiation measurement and enhances safety protocols for both patients and healthcare professionals.

The establishment of the TLD Lab reinforces NICVD's commitment to advancing healthcare technology and maintaining the highest standards of safety in medical radiation practices.
